Instructions:

Fill in the above details as you want them to appear on the analysis reports. One or more sheet per equipment is allowed, but do not place more than one equipment on one sheet.

- 1) **Type** refers to generic equipment type, e.g. compressor, turbine, generator, diesel engine, etc.
- 2) **Manufacturer** is the maker of the equipment, e.g. Caterpillar, Mercedes-Benz, etc.
- 3) **Model** is the model number of the equipment.
- 4) **Customer reference** refers to what the customer tags this particular machine.
- 5) **Sample point** refers to where the sample is taken from, e.g. compressor sump, gearbox sump, oil reservoir, etc.
- 6) **Lubricant grade** refers to the name of the Fuchs lubricant in use and its viscosity grade, e.g. Titan Power 200 SAE 40, Renolin B 46, etc.
- 7) **System capacity** is the capacity of the oil reservoir.
- 8) **Sampling frequency** refers to how often the lubricant samples will be sent to be analysed using the CENT program.
- 9) Enter here any other relevant information which might be of use in describing the machine condition and working environment, e.g. date of last overhaul, machine in use or standby, etc.

After completing the details, send the form to:

*CENT Specialist,
Alhamrani-Fuchs Petroleum Saudi Arabia Ltd.
Yanbu Blending & Grease Plant
P. O. Box 30439,
Yanbu Al Sinaiyah,
Saudi Arabia.*

*Tel: + 966 (4) 396 0987
Fax: + 966 (4) 396 3783*

CENT Specialist to input data in Database and fill in the CENT Reference Number in box below.
